Khulna Student Ecosystem

Contents

1	Welcome to KSE	What KSE is and what you can do with it
2	Getting Started	Install, create an account, sign in, onboarding
3	The Home Screen	Your daily starting point and quick access tiles
4	Exploring Opportunities	Internships, events, workshops, filters and applying
5	Scholarships & the Application Tracker	Find funding and track every application
6	Bachelor To-Let — Student Housing	Find rooms, sublets and mess seats near campus
7	Tuition — Find a Tutor or Become One	Tutor discovery, requests and tutor applications
8	Student Hub	Local services, shops and student deals
9	Book Exchange	Sell, swap or give away used books
10	Research Partners	Find a collaborator for your next project
11	Mess Management	Meals, bazar duty, expenses, finance and settlement
12	Communities	Clubs, discussions, polls and community events
13	Your Profile & Portfolio	Education, projects, certificates, resume and more
14	Dashboard, Saved & Search	Deadlines, bookmarks and global search
15	Notifications	Your in-app inbox and deadlines that matter
16	Settings, Help & Quick Reference	Appearance, account, FAQ and where everything lives

Welcome to KSE

One app for your whole student life in Khulna.

KSE — the **Khulna Student Ecosystem** — brings every opportunity and daily need of student life together in one place. Instead of scrolling random Facebook groups and missing deadlines, you get a clean, verified, searchable app made for students.

1.1 What you can do with KSE

Discover opportunities

Internships, scholarships, events and workshops — manually curated and verified before publishing.

Find housing

Bachelor To-Let listings: rooms, sublets, host families and mess seats near campus.

Get a tutor

Search verified tutors by subject, university, location and fee — or apply to become one.

Run your mess

Meals, bazar duty, shared expenses, balances and monthly settlement — built for real messes.

Student Hub

Local services, shops and student deals around your campus, suggested by students.

Communities

Follow clubs and study groups, take part in discussions, polls and community events.

Book Exchange

Sell, swap or give away used textbooks to students who need them next.

Research Partners

Publish your research profile and find a collaborator for your next project.

1.2 Who this manual is for

This manual covers the **KSE mobile app** end to end — every screen and every action, written in plain English. You don't need any technical knowledge. Read it from the start, or jump straight to the chapter you need from the contents page.

Quality promise: every internship, scholarship, event and tutor on KSE is reviewed by the KSE team before it becomes visible. Items marked **“Manually curated”** were checked by a human, not scraped by a bot.

1.3 A quick word on words

TERM	MEANING ON KSE
Bazar	The grocery shopping trip for your mess — who buys, what was bought, and what it cost.
Settlement	The end-of-month calculation that shows exactly who owes what in your mess.
To-Let	A room, sublet or seat advertised for rent — listed by students, for students.
Bookmarked	An opportunity you saved for later — it appears on your Saved list and Dashboard.
Manager	The member of a mess who approves joins, records expenses and locks the monthly settlement.

Getting Started

Install the app, create your account and finish the welcome tour.

2.1 Install KSE on your phone

- **Android:** install the **KSE.apk** file (allow “Install from unknown sources” when asked), or get KSE from the Play Store when published.
- **iPhone:** install through TestFlight or the App Store when published.
- **Web:** open the KSE web app in any modern browser — your account works everywhere.

2.2 Create an account

- 1 Open KSE. On the **Login** screen tap **Create an account**.
- 2 Enter your **Full name**, **Email** and a **Password (8+ characters)**.
- 3 Tap **Create account**.
- 4 If email confirmation is enabled for your region, check your inbox for the verification email first — then sign in.

Prefer Google?

On the Login screen tap **Continue with Google** and pick the account you want to use. No password to remember — the same profile is created for you automatically.

2.3 Sign in and reset your password

- Signing in: enter your **Email** and **Password** and tap **Sign in**.
- Forgot your password? Tap **Forgot password?**, enter your email, and follow the reset link sent to you.

2.4 The welcome tour (onboarding)

The first time you sign in, KSE walks you through three short screens:

SCREEN	WHAT IT SHOWS
Welcome	A one-line introduction to the Khulna Student Ecosystem. Tap Start .
Opportunities	The kinds of opportunities waiting for you — internships, scholarships and more. Tap Next .
Student Community	Clubs, discussions and the wider student network. Tap to finish and land on Home.

 **Tip:** the richer your profile (university, department, skills), the better KSE can recommend opportunities for you. Chapter 13 shows you how.

2.5 Moving around the app

Four tabs live in the bottom bar on every main screen, with a + button in the middle for quick actions:

Screens like **Dashboard**, **Notifications**, **Saved** and **Search** open from buttons inside these tabs — each is explained in its own chapter. Wherever you are, the  back arrow in the top-left takes you back.

The Home Screen

Greeting, search, banners, recommendations and the latest drops.

Home is your dashboard for the day: it greets you by name, lets you search anything, and collects the freshest opportunities in one scroll.

3.1 What you'll see

ELEMENT	WHAT IT DOES
Greeting	"Hi, <i>your first name</i> 🍌" — proof you're signed in as you.
Search bar	Type anything and press enter to search the whole app (Chapter 14).
 Bell	Opens your notification inbox. A dot means you have unread items.
 Grid	Opens your Dashboard with deadlines and profile score (Chapter 14).
Promo carousel	Rotating banners — including KSE's Bangla motto "পড়াও, শেখো, আয় করো" (teach, learn, earn).
Quick Access	Ten tiles to jump straight into any area — see below.
Recommended for You	Opportunities matched to your profile and interests.
Latest Opportunities	The newest published items, with See All to open the full lists.
Hot To-Lets	Fresh student housing listings near campus (Chapter 6).

3.2 Quick Access tiles

Ten one-tap shortcuts cover the whole app:

3.3 The + quick actions sheet

Tap the + in the bottom bar for the things you're most likely to want to *do* (not just browse):

- **My dashboard** — profile score, saved opportunities, upcoming deadlines
- **Browse internships / Find scholarships / Find a tutor** — straight into discovery
- **Open Student Hub** — local services, shops and student deals
- **Suggest a place** — add a local service for review (Chapter 8)

- **Post a To-Let** — list a room, sublet or mess seat (Chapter 6)
- **Sell or exchange a book** — reach students looking for your used books (Chapter 9)
- **Join a community** — student clubs and study groups (Chapter 12)

Missed something? If a section shows “Nothing published yet”, that simply means no verified content is live right now — new listings are added regularly, so check back soon.

Exploring Opportunities

Internships, events, workshops — browse, filter, save and apply.

The **Explore** tab is the front door to everything KSE offers. Each category card shows a live count of what's waiting inside.

4.1 The ten Explore categories

CATEGORY	WHAT'S INSIDE
Internships — <i>Launch your career</i>	Internships from verified organizations, local and remote.
Scholarships — <i>Fund your studies</i>	Local and international funding (Chapter 5).
Bachelor To-Let — <i>Rooms & sublets</i>	Student housing near campus (Chapter 6).
Events — <i>Meetups & seminars</i>	Events you can register for in one tap.
Workshops — <i>Learn new skills</i>	Hands-on workshops with registration.
Tuition — <i>Find a tutor</i>	Verified tutor profiles (Chapter 7).
Mentorship — <i>Grow with a mentor</i>	Coming soon — KSE will announce when mentor matching opens.
Student Hub	Local services, shops, deals (Chapter 8).
Book Exchange	Used books to swap or buy (Chapter 9).
Research Partners	Collaborators for projects (Chapter 10).

The search field at the top of Explore filters the categories themselves — type “book” to jump straight to Book Exchange.

4.2 Browsing and filtering a list

Open any category (say, **Internships**) and you get a card list: title, organization, location, mode and deadline. Buttons at the top of the list:

- **Filters** — a sheet slides up with the filters available for that category.
- **Load more** — appends the next page of results; lists are paginated to stay fast.

Typical filters

Mode: Remote / On-site / Hybrid

Deadline: e.g. next 7 days

Category or type

Sort: most recent / rent high → low (To-Let)

Tap **Apply** to filter, or **Reset** to start over. Scholarship, To-Let and Tutor lists add their own filters (funding type, room type, subject, fee...).

4.3 The opportunity detail page

Tap any card to open the full detail. What you'll find:

The facts

Title, organization, type, location, mode (remote / on-site / hybrid), eligibility and the full description.

Deadlines

Application deadline for internships & scholarships; **Registration deadline** for events & workshops.

Save it

The bookmark button adds the item to your **Saved** list so it lands on your Dashboard deadline tracker.

Apply / Register

Apply now opens the official application page in your browser. Events and workshops show **Register** instead.

Two states change the buttons: once the deadline passes you'll see **Deadline passed** (disabled), and events that closed show **Registration closed**. Items reviewed by the KSE team carry the **Manually curated** badge.

 **Why we send you to the official link:** KSE shows you the opportunity and reminds you of the deadline — the application itself happens on the organizer's official page, so nothing gets lost in translation.

4.4 Events & workshops registration

- 1 Open **Explore** → **Events** (or **Workshops**).
- 2 Filter if you like — by date, organizer, location or online/offline.
- 3 Tap an event and press **Register**.
- 4 Your registrations appear on your **Dashboard** under registrations.

Scholarships & the Application Tracker

Find funding, then manage every application from Saved to Selected.

Scholarships work like any opportunity list — the magic is the built-in **application tracker** that keeps your whole scholarship campaign organized.

5.1 Find scholarships

- 1 Go to **Explore** → **Scholarships**.
- 2 Use filters such as **local / international**, university, degree level and funding type to narrow the list.
- 3 Open a scholarship to read the eligibility, funding details and deadline.
- 4 Tap **Apply now** to open the official application page.

5.2 Track an application

On any scholarship detail page, tap **Add to application tracker** (or **Update tracker** if you already track it) and pick a status:

Saved

Interested

Preparing

Applied

Rejected

Selected

Update the status any time as you progress — KSE confirms each change so you always know the tracker took it.

5.3 My Scholarships

Open **Profile** → **My Scholarships** to see every tracked scholarship in one list, each with a colored status chip and its deadline. It's your campaign overview — nothing gets forgotten the week it's due, because tracked items also feed your Dashboard deadlines.

 **Workflow suggestion:** mark everything plausible as *Interested* while you browse, promote the real candidates to *Preparing* a few weeks out, and switch to *Applied* the moment you submit. Watching the list turn green is weirdly satisfying.

Bachelor To-Let

Rooms, sublets, host families and mess seats — by students, for students.

“Bachelor To-Let” is KSE’s housing market: verified listings posted by students and landlords, filtered for exactly what a student in Khulna needs.

6.1 Find a place

- 1 Open **Explore** → **Bachelor To-Let** (or a Hot To-Let card on Home).
- 2 Search by *area, landmark or room type* in the search bar.
- 3 Tap **Filters** to narrow by city (Khulna, Jessore, Rajshahi...), area, room type and gender preference; sort by most recent or rent.
- 4 Tap a listing for photos, rent, address details and the person to contact.

Room types you'll see

Single room Mess sublet Host family ...and other student-friendly types

6.2 Post a listing

Got a room, sublet or mess seat to offer?

- 1 From the To-Let list tap **Post a listing** (or use + → **Post a To-Let**).
- 2 Fill in the details: title, area, room type, rent, gender preference and description.
- 3 Add photos (up to the per-listing photo limit — grant photos access when asked).
- 4 Submit. Your listing first goes to **Pending review** — the KSE team checks it before it goes live.

6.3 Manage your listings

Tap **My listings** on the To-Let screen to see your posts and their status:

Pending review Published Rejected Expired Archived

No longer renting? Open the listing and tap **Withdraw** — after confirming, the listing is no longer visible to other students.

 **Safety first:** visit the place with a friend before paying anything, and keep conversations inside your normal channels. KSE verifies listings, but you should always verify the person.

Tuition — Find a Tutor or Become One

Verified tutors near your university, and a tutor application for students who teach.

The Tuition area is a discovery + request workflow — simple on purpose. Find the right tutor, send a request, and track its status. No marketplace, no middleman fees.

7.1 Find a tutor

- 1 Open **Explore** → **Tuition**.
- 2 Filter by **subject**, university, location and expected monthly fee.
- 3 Tutors carrying the ✓ Verified badge have been checked by the KSE team.
- 4 Open a tutor to see their full profile: **About**, **Subjects**, **Availability**, **University**, **Location**, fee and **Reviews** from other students.

7.2 Send a tuition request

- 1 On a tutor's profile tap **Request tuition**.
- 2 Confirm the **subject** (and tutor), write a short message, and optionally add a preferred time.
- 3 Tap **Send request**.

Track your requests

Open **My tuition requests** (from the Tuition area or your + sheet). Each request shows:

Pending Accepted Rejected Closed

7.3 Become a tutor

If you teach (or want to), apply once — your tutor card then appears in discovery:

- 1 Go to **Profile** → **Become a Tutor**.
- 2 Pick the **subjects** you teach (at least one).
- 3 Set your **monthly fee range** in taka (whole numbers, e.g. 2500) and your location.
- 4 Write a short bio — e.g. “CSE undergrad teaching programming fundamentals” — and **Submit application**.

The KSE team reviews applications. Once approved you're listed as a tutor; if an application isn't approved you can simply apply again.

💡 **Tutor tip:** a specific bio beats a general one. “CSE undergrad teaching C and Python to 1st-years” gets better requests than “I teach everything”.

Student Hub

Local services, shops and student deals — built by students, for students.

The Student Hub answers everyday questions: where's the nearest laundromat, which shop gives a student discount, who repairs bicycles near campus. Content is people-powered — suggested by students and reviewed before going live.

8.1 Browse the Hub

- 1 Open **Explore** → **Student Hub** (or the Quick Access tile).
- 2 Category cards group the Hub — for example **Study & Research**, **Daily Life**, **Mobility** and **Student Deals** — each with a live listing count.
- 3 Tap a category, then a listing, for details like address, phone, opening hours and what the place is known for.
- 4 Use the Hub search to find a place by name or keyword directly.

8.2 Suggest a place

Know a shop or service other students would love? Add it in a minute:

- 1 Tap **Suggest a place** (Hub screen or the + quick actions).
- 2 Fill in the **place name** (e.g. "New Star Laundry"), **category** and **service type** (e.g. "Wash, Dry cleaning, Pickup").
- 3 Add the **city** (e.g. Khulna), **area** (e.g. Shibbari), street address and a landmark.
- 4 Add a phone number, opening hours (e.g. "Sat–Thu 9:00–21:00") and a one-line summary of what the place is known for.
- 5 Tap **Send suggestion** — the KSE team reviews it, then publishes it to the Hub.

Good suggestions are specific: exact landmarks, real opening hours and the one thing the place is genuinely known for make a listing useful for everyone.

Book Exchange

Swap, sell or give away the books you're done with.

Every semester ends with books you'll never open again — and every semester starts with someone hunting for exactly those books. Book Exchange connects the two.

9.1 Find a book

- 1 Open **Explore** → **Book Exchange**.
- 2 Search or browse listings — each shows the title, author, edition, subject, condition and asking price.
- 3 Open a listing for the full description, condition notes and the seller's phone number.

9.2 Post a book

- 1 Tap **Post a book** (or + → *Sell or exchange a book*).
- 2 Enter the **book title**, **author**, edition and subject.
- 3 Choose the **condition** and set your **price in BDT**.
- 4 Pick what the book is **available for** — sale, exchange or giveaway — and, for exchanges, which book you'd accept in return.
- 5 Add condition notes (markings, meeting place...) and a **phone number** so buyers can reach you.
- 6 Attach a cover photo, then submit for review.

9.3 Manage your listings

My listings on the Book Exchange screen shows everything you've posted and its review status — same lifecycle as To-Let: pending review → published.

Meet smart: arrange handovers on campus or another public place in daylight, and check the book before paying.

Research Partners

Publish your research profile and find your next collaborator.

Great projects rarely happen alone. Research Partners is a small, focused directory of students who want to collaborate on research — thesis work, competitions, papers.

10.1 Publish your research profile

- 1 Open **Explore** → **Research Partners** and tap **My research profile**.
- 2 Enter your **research interest** (e.g. "Computer Vision") — required.
- 3 Add your **skills** and your **university / institution** (e.g. KUET).
- 4 Save — your profile now appears in the directory for other students to find.

10.2 Find a collaborator

- **Search** by research interest, topic or skill — e.g. "machine learning" or "survey design".
- Browse the cards to see each student's interest, skills and institution.
- Open a profile and use the contact details to start the conversation.
- **Load more** appends further results.

💡 **Tip:** keep your interest line specific — "Computer Vision — medical imaging" attracts the right partners far faster than "technology".

Mess Management

Meals, bazar duty, shared expenses, balances and a transparent monthly settlement.

IN THIS CHAPTER

- Create & join a mess
- Mess Home (today at a glance)
- Meals & the monthly calendar
- Bazar entries & duty calendar
- Shared expenses
- Finance — balance & payments
- Settlement — close the month
- Members & manager tools
- Mess settings

KSE's mess module replaces the notebook on the fridge. Everyone sees meals and costs in real time, and the month ends with a settlement everyone can check line by line. Reach it from the Home **Mess** tile or + quick actions.

11.1 Create or join a mess

+ Create a Mess

Set the mess name (e.g. "12 No. Bachelor Mess"), location (e.g. Boyra, Khulna) and max members. You become the mess **manager**.

Join with Code

Enter the **mess code** (e.g. MESS-8F42) your manager shares, plus the invite code if the mess uses one. Your request waits for approval.

The Mess Hub lists every mess you belong to — active messes open with a tap, and **pending** ones show "Waiting for manager approval". One person can be in several messes.

11.2 Mess Home — today in seconds

Each mess has its own screen with a five-button bar:

 Home Today at a glance	 Meals Calendar & on/off	 Bazar Groceries & duty	 Finance Balance & payments	 More Members · settings
---	--	---	---	--

Mess Home shows:

- **Today's meals** — breakfast, lunch, dinner, each with a one-tap **ON** / **OFF** toggle. Meal cut-off times (set by the manager) close each window — after that KSE tells you exactly when it closed.
- **Your balance** for the month and the current **meal rate**.
- **Your next bazar duty** — with a button to request an **exchange** from the member's own screen.
- **Announcements** from the manager, as one subtle banner.

- Incoming **exchange requests** for your duties — accept or reject them right there.

11.3 Meals

The **Meals** tab manages today plus the whole month:

- Toggle today's meals on/off (respecting cut-offs).
- A **monthly calendar** shows every member's meals per day — check any past or future date.
- Switch months to review history before settlement.

11.4 Bazar — entries and duty

Record a bazar trip

- 1 Open the **Bazar** tab and tap **Add Bazar**.
- 2 For each item, tap **Add Item** and enter the name, quantity, unit and price.
- 3 Tag items by category: **Vegetables** **Grocery** **Spices** **Snacks** **Cleaning** **Other**.
- 4 Tap **Save Bazar** — the month total updates instantly and every member sees the entry.

The duty calendar

- **Bazar → Duty** shows who buys on which day — your own duties are highlighted so “when do I have to buy?” is answered at a glance.
- **Managers** assign, reassign and remove duties (**Assign Duty**).
- **Members** request a duty **exchange**; the other member accepts or rejects, and accepted swaps update the calendar automatically.

11.5 Expenses

Shared fixed costs — rent, utilities, wifi — live in **More → Expenses**:

- Everyone sees the month's expense total and transaction list.
- The **manager** adds expenses (**Add Expense** — amount, date, description) and can delete mistakes.
- Expenses feed the month's balance alongside bazar and meals.

11.6 Finance — your balance and payments

- **My Balance** breaks the number down: meals eaten, bazar you paid for, shared expenses — every line visible.
- Record a payment you made with **Record payment** (amount + date). Payments are auto-confirmed; the manager can also record or verify them later.
- Payment statuses: **Pending** **Confirmed** **Rejected**.
- Your full payment history stays in the **Payments** screen (also on the More tab).

11.7 Settlement — closing the month

Settlement turns the month into a final, checkable number. The manager drives it in three steps:

1 • Generate

Generate Settlement builds a draft from the month's meals, bazar and expenses — with the full breakdown shown.

2 • Publish

Publish shares the settlement with every member, each seeing their own final balance.

3 • Lock

Lock Month freezes the month for good — no more edits to meals, bazar or expenses.

Every member can open **More** → **Settlement** and inspect exactly how their number was calculated — no more notebook arithmetic arguments.

11.8 Members & manager tools

More → **Members** shows who lives in the mess. As manager you can:

- **Accept / reject** join requests from people who used your mess code.
- **Remove** a member who moved out.
- **Make Manager** — hand the manager role to another member when you leave.
- See and share the mess **invite code**.

11.9 Mess settings

- **Mess information** — name, location; members see it on the mess home.
- **Meal cut-offs** — breakfast, lunch and dinner cut-off times (HH:MM). Defaults apply until you change them; after a cut-off, meal toggles for that meal close for everyone.
- **Announcements** — post a notice that appears as the banner on every member's mess home.

Settings are **manager-only**; members get a read-only view so the rules are never a mystery.

Communities

Follow clubs, join discussions, vote in polls and attend community events.

The **Community** tab gathers student clubs, study groups and interest circles around Khulna — deliberately simple: posts, polls and events, not a full social network.

12.1 Find and follow communities

- The tab opens with **Recommended for you** and **Trending discussions** across KSE.
- Use *Search communities...* to find a club by name.
- Open a community to see its description, university and members; tap **Join community** (then **Joined** to leave).

12.2 Posts & discussions

Inside a community the feed shows posts from members. As a member you can create four kinds:

Discussion Question Opportunity Announcement

- 1 Tap the post composer (or **+** in the community).
- 2 Choose the type — e.g. *Question* asks “What do you want to ask?”; *Opportunity* asks you to share the opportunity, eligibility and link.
- 3 Write your text and optionally **add an image**.
- 4 Post — it appears in the feed immediately. Community moderators can pin posts as announcements.

Open any post to comment. “Be the first to comment” means exactly that — break the ice. Some older discussions are **locked** and read-only.

12.3 Polls

- 1 In a community tap **Create poll**.
- 2 Ask a clear question (at least 5 characters) and add the options.
- 3 Choose when results are visible: **Always visible** **After voting** **After poll closes**.

12.4 Community events

- 1 In a community tap **Create event**.
- 2 Set the title, start and end time (format *YYYY-MM-DD HH:MM*), and the mode: **Online** **On campus** **Hybrid**.

3 Publish — the event appears in the community's **Community events** section.

12.5 Request a new community

Want a community that doesn't exist yet? Tap **Create in community** on the Community tab, fill in the details (with an optional image) and submit. Your request goes to the KSE team for review — you'll see it marked “pending admin review” until it's approved.

Reporting: see something wrong in a community? Use the report (flag) action on the post — moderators review reports.

Your Profile & Portfolio

Personal info, education, projects, certificates, achievements, research, resume and links.

Your profile powers better recommendations; your portfolio is the living CV you'll actually reuse for internship and scholarship applications.

13.1 The Profile tab

- Your **name and avatar**, with a **profile completion %**.
- **Improve Profile** / **Edit profile** — update your full name, university, department, academic level, phone, bio, interests and skills.
- **My portfolio** — the full portfolio (below).
- **My Scholarships** — your application tracker (Chapter 5).
- **Become a Tutor** — tutor application (Chapter 7).
- **Quick links** — Dashboard and Saved.
- **Settings** and **Sign out**.

Why complete your profile? KSE recommends opportunities using your university, department, skills and interests — an empty profile gets generic results, a full one gets *yours*.

13.2 Portfolio sections

Open **Profile** → **My portfolio**. Every section supports add, edit and delete:

SECTION	WHAT TO ADD
 Education	Education level, institution (pick from the list — or request a missing one), district (Khulna division and beyond), details and dates.
 Projects	Title, description, tech stack, project link, showcase fields and dates.
 Certificates	Title, issuer, issue date and certificate details.
 Achievements	Title, description and date — competitions, awards, honors.
 Research	Title, abstract, your role, collaborators, link and date.
 Resume	Your resume file — mark one as primary. The file name is kept for reference.
 Links	Portfolio and social links with labels (GitHub, LinkedIn, personal site...).

13.3 Privacy

Portfolio and profile details are yours: public fields are clearly defined, and private items (resume, certificates) stay private to you. KSE asks for the minimum data a student platform needs — and never shares your phone number or email with other students.

Dashboard, Saved & Search

Deadlines at a glance, everything you bookmarked, and one search box for the whole app.

14.1 Dashboard

Open it from the  **grid** on Home, the + sheet, or Profile quick links:

Profile score gauge

A live gauge (indigo hero) showing how complete your profile is — with an **Improve Profile** shortcut.

Opportunity overview

A 2×2 grid of live published counts across opportunity types.

Upcoming deadlines

Your next three saved deadlines — the reason bookmarking pays off.

14.2 Saved (bookmarks)

- Tap the **bookmark icon** on any opportunity card or detail to save it.
- Open **Profile** → **Saved** to see everything, newest first.
- Tap the bookmark again (card or detail) to remove it.

14.3 Search — one box for everything

Type in the search bar on **Home** or **Explore** and press enter to open the global search screen. It covers opportunities, tutors, communities and hub listings:

- 1 Results update as you type — search titles, organizations and keywords.
- 2 Narrow with the same filters you know from the lists (type, mode, deadline).
- 3 Tap **Clear search** / **Clear all** to start over, or **Load more** for more results.
- 4 Browse by category instead via the **Explore categories** row on the search screen.

If nothing matches, KSE suggests trying a different keyword or loosening the filters — and sometimes content just hasn't been published yet (“Verified listings are on their way”).

Notifications

Your in-app inbox for deadlines, announcements and what matters to you.

Tap the  **bell** on Home to open your notification inbox. A red dot on the bell means something new is waiting.

15.1 Reading and managing

- Unread notifications carry a purple dot; opening one marks it read.
- Tapping a notification also **jumps to the related item** — a deadline reminder opens that opportunity.
- **Mark all read** clears the unread state in one tap.

15.2 What arrives here

NOTIFICATION	WHEN
Scholarship deadline approaching	A tracked or saved scholarship closes soon.
Saved internship deadline	Something on your Saved list is about to expire.
New matching opportunity	A published item matches your profile and interests.
Upcoming event	An event or workshop you registered for is near.
Community announcement	A community you joined posts an announcement.
Platform announcement	News from the KSE team — global, university-specific or targeted.

Don't miss deadlines: bookmark (Saved) or track (scholarships) everything you seriously intend to apply for — reminders are built around your saved list.

Settings, Help & Quick Reference

Appearance, account basics, frequently asked questions, and where everything lives.

16.1 Settings

Open **Profile** → **Settings**:

- **Appearance** — choose **Light**, **Dark** or **System**; KSE follows your choice everywhere.
- **Sign out** — confirm and you're out; you'll need to sign in again to use KSE.

16.2 Frequently asked questions

QUESTION	ANSWER
Is KSE free?	Yes — every student feature in this manual is free to use.
Why does a listing say “Pending review”?	User-submitted content (To-Lets, books, places, communities) is checked by the KSE team before it becomes public.
An opportunity says “Deadline passed” — can I still apply?	No. Once the deadline passes the button is disabled; use filters like “next 7 days” to find live ones.
Can I be in more than one mess?	Yes — the Mess Hub lists all your messes; pending ones wait for manager approval.
Can I stop being a tutor?	Contact the KSE team and they'll remove your tutor listing.
Does KSE work offline?	Browsing needs internet. The app is built to be fast on normal mobile networks.
How do I delete my account?	Request account deletion through the KSE support contact — your data is removed with it.

16.3 Quick reference — where everything lives

16.4 Coming soon

Mentorship matching is on the roadmap, along with richer recommendations and messaging. The KSE team publishes platform announcements in your notification inbox as new features land.

That's KSE — everything in one place. 🎓

Questions or feedback? Reach the KSE team through the app's support contact.
